

PHARMACY AUDIT CHECKLIST

A practical operational, compliance and business performance review tool for retail and hospital-linked pharmacies.

Pharmacy / Store Name	
Location	
Audit Date	
Auditor	
Responsible Pharmacist	

Rating method

C = Compliant, P = Partially compliant, NC = Non-compliant and N/A = Not applicable. Record evidence and corrective actions for all P and NC items.

Overall Score	_____ / 100	Risk Level	Low / Medium / High
Critical Findings	_____	Target Closure Date	_____

Prepared by Medvika Healthcare Solutions

Building Better Pharmacies. Growing Better Businesses.

1

Licences, Registrations and Display

Verify that mandatory approvals are current, accessible and aligned with actual operations.

Audit item	C	P	NC	N/A
☐ Drug licence and all relevant registrations are valid, current and displayed where required.				
☐ Licensed premises details, constitution and authorised persons match current records.				
☐ Registered pharmacist details, registration certificate and employment records are available and current.				
☐ Renewal dates are tracked with reminders and named responsibility.				
☐ Inspection records, correspondence, notices and previous corrective actions are maintained.				
☐ Required notices, operating hours, pharmacist availability and customer information are displayed.				
☐ Controlled or scheduled medicine records are maintained where applicable.				
☐ GST, local trade, Shops and Establishments and other applicable registrations are current.				
☐ No unapproved activity is being conducted outside the licensed scope or premises.				

Evidence / Notes

2

Premises, Storage and Safety

Assess physical conditions that affect product quality, staff safety and customer experience.

Audit item	C	P	NC	N/A
☐ Premises are clean, organised and free from seepage, pests, dust and avoidable clutter.				
☐ Storage areas protect products from direct sunlight, excessive heat, moisture and contamination.				
☐ Air-conditioning or ventilation is adequate and temperature monitoring is documented where required.				
☐ Pharmaceutical refrigerator is suitable, clean, monitored and supported by an action plan for temperature excursions.				
☐ Expired, damaged, recalled and returned stock is segregated and clearly labelled.				
☐ Scheduled, high-value or sensitive products are stored with appropriate access control.				
☐ Fire extinguisher, emergency contacts, electrical safety and evacuation access are maintained.				
☐ CCTV, cash security and restricted-access controls are functional where used.				
☐ Customer movement, waiting, counselling and billing areas are safe and accessible.				

3

Prescription, Dispensing and Patient Safety

Review whether dispensing is accurate, traceable and supported by appropriate professional checks.

Audit item	C	P	NC	N/A
☐ Prescriptions are reviewed for completeness, legibility, dose, route, duration and obvious safety concerns.				
☐ Pharmacist intervention and escalation are used when clarification is required.				
☐ Medicine selection includes correct brand/generic, strength, dosage form, pack and quantity.				
☐ Patient identity and prescription details are matched before handing over medicines.				
☐ Labels, storage instructions and counselling are provided when needed.				
☐ High-risk, look-alike and sound-alike medicines have additional controls.				
☐ Returns, substitutions and partial supplies follow documented rules and applicable requirements.				
☐ Confidentiality is protected during counselling, billing and record handling.				
☐ Dispensing errors, near misses and complaints are documented, reviewed and acted upon.				
Evidence / Notes				

4

Purchase, Receiving and Vendor Controls

Confirm that procurement is authorised, traceable and protected from quality and financial risks.

Audit item	C	P	NC	N/A
☐ Only approved and verified vendors are used for regulated products.				
☐ Purchase orders or authorised purchase decisions are documented.				
☐ Goods receipt checks supplier, invoice, product, quantity, batch, expiry, MRP, rate and physical condition.				
☐ Cold-chain products are checked and transferred promptly to controlled storage.				
☐ Discrepancies, shortages, breakage and damaged packs are recorded and resolved.				
☐ Purchase returns and credit notes are tracked to closure.				
☐ Schemes and discounts are verified without driving unnecessary overstocking.				
☐ Vendor performance is reviewed for service, availability, returns and documentation quality.				
☐ Purchase data is reconciled with stock and accounting records.				

5

Inventory, Expiry and Stock Accuracy

Evaluate availability, working-capital efficiency and controls over expiry and loss.

Audit item	C	P	NC	N/A
☐ Physical stock matches system stock within defined tolerance.				
☐ FEFO is followed and shelf arrangement supports easy batch and expiry rotation.				
☐ Near-expiry stock is identified early and reviewed on a defined schedule.				
☐ Expired, damaged, recalled and non-saleable stock is removed from sale immediately.				
☐ Non-moving and slow-moving stock is reviewed with corrective action.				
☐ Minimum, maximum and reorder levels are defined for key categories.				
☐ Stock-outs, substitutions and lost-sales patterns are tracked.				
☐ High-value and sensitive items receive cycle counts or enhanced controls.				
☐ Inventory turnover, days of stock, expiry exposure and dead stock are reviewed monthly.				
☐ Adjustments, write-offs and stock corrections require authorisation and evidence.				
Evidence / Notes				

6

Billing, Cash and Financial Controls

Review transaction accuracy, leakage risks and basic financial discipline.

Audit item	C	P	NC	N/A
☐ Every sale is billed through the authorised system and invoice sequence is controlled.				
☐ MRP, selling price, discounts and taxes are applied correctly.				
☐ Cash, card, UPI, credit and delivery collections are reconciled daily.				
☐ Refunds, returns, voids and manual discounts require approval and are reviewed.				
☐ Cash shortages or excesses are documented and investigated.				
☐ Daily sales reports are reviewed and retained.				
☐ Purchase, sales and inventory figures are periodically reconciled.				
☐ Gross margin, operating expenses, net margin and break-even sales are monitored.				
☐ User access prevents unauthorised price changes, backdated entries or deletion of transactions.				

7

People, Training and SOP Compliance

Assess whether roles, competence and accountability support consistent operations.

Audit item	C	P	NC	N/A
☐ Roles, responsibilities and reporting lines are clearly documented.				
☐ Employee identity, qualification, pharmacist registration and joining records are maintained.				
☐ Attendance, shifts, leave and pharmacist coverage are controlled.				
☐ Current SOPs are available for opening, closing, dispensing, billing, purchase, returns and inventory.				
☐ Staff have been trained and competency is verified for critical tasks.				
☐ New staff receive structured induction before independent work.				
☐ Customer communication, counselling, hygiene, confidentiality and escalation are covered in training.				
☐ Performance gaps, incidents and repeated errors lead to documented coaching or corrective action.				
☐ Emergency, power failure, software downtime and security procedures are understood.				

Evidence / Notes

Verify system reliability, access control and use of information for management decisions.

Audit item	C	P	NC	N/A
☐ Pharmacy software supports required sales, purchase, return, expiry, GST and inventory functions.				
☐ Each user has a unique login with role-based permissions.				
☐ Passwords, backups and restoration procedures are defined and tested.				
☐ Device security, antivirus, updates and physical access are controlled.				
☐ Customer and prescription data is used and stored responsibly.				
☐ Critical reports are reviewed: sales, margin, stock-outs, expiry, slow-moving stock and adjustments.				
☐ Downtime and data-loss incidents are documented and escalated.				
☐ Interfaces with accounting, delivery or online systems are reconciled.				
☐ Management uses data trends to assign and track corrective actions.				

Customer Experience and Business Performance

Review service quality, retention and sustainable growth practices.

Audit item	C	P	NC	N/A
☐ Operating hours, phone, WhatsApp, website and Google Business Profile information are accurate.				
☐ Customer waiting time, availability and complaint patterns are reviewed.				
☐ Complaints are acknowledged, investigated and closed within defined timelines.				
☐ Home delivery, credit and online orders follow clear controls and service standards.				
☐ Promotional communication is ethical and does not make misleading claims.				
☐ Customer retention and repeat purchase indicators are monitored.				
☐ Category performance and local demand are reviewed for assortment decisions.				
☐ Staff service behaviour is periodically observed and coached.				
☐ Business goals and monthly KPIs are documented and reviewed.				
Evidence / Notes				

AUDIT SUMMARY AND CORRECTIVE ACTION PLAN

Record the most important findings, responsible persons and closure dates. Prioritise patient safety, legal compliance, product quality and financial-control risks.

Section	Score / Status	Key Finding
1. Licences and display		
2. Premises and safety		
3. Dispensing and patient safety		
4. Purchase and vendors		
5. Inventory and expiry		
6. Billing and finance		
7. People and SOPs		
8. Technology and data		
9. Customer and performance		

CORRECTIVE ACTION TRACKER

Use one line for each priority finding. Attach supporting evidence when an action is completed.

No.	Finding / Risk	Corrective Action	Owner	Due Date	Status
